Experience

Senior Data Engineer PROGRESSIVE Jan 2024 - Present

- Delivering aspects of LLM research to continuously iterate on claim summarization which aids client-facing representatives in information retrieval. (FastAPI, OpenAI, LangChain, pytest)
- Building large data applications in distributed systems in an order that delivers iterative value.
- Cross-functionally collaborate to productionize and maintain in a legacy laden environment.

Consultant - Data Science, Computer Vision Apr 2023 - Dec 2023

- Build rapid proof-of-concepts leveraging the latest research in transfer learning techniques to aid architectural, scoping, and planning discussions. (huggingface-transformers, AWS Lambda)
- Assess and develop features supporting the Machine Learning model development lifecycle in varying environments. (MLflow, python)
- Help clients identify opportunities within existing processes for Machine Learning integration.

Machine Learning Engineer INTEROS Oct 2019 - Oct 2022

- Strategist and developer of a platform to analyze corporate homepages for business relevant data, yielding tens of thousands of new relationships for the corporate product
- Owned machine learning models which capture corporate information from web pages by analyzing specific components of corporate web pages (corporate blogs, pdfs, etc.)
- Assisted in implementing observability and monitoring across projects.
- Established and led a monthly reading group on the latest academic publications.

Used: Python, pytorch, huggingface-transformers, pytesseract, pytest, pandas, scikit-learn, Apache Spark, FastAPI, Diffbot, Kubernetes, AWS

Machine Learning Engineer SOKAT CONSULTING Nov 2018 - Sept 2019

- Innovation Award winning data visibility solution to safeguard federal grant investments.
- Engaged in cross-functional conversations and exploratory data analysis to collaboratively define and design highest value features within environment constraints.
- Developed and engineered data harmonization of seven different publicly available sources.
- Built tree-based ML model to estimate audit finding risk of grant eligible, tax-exempt organizations.
- Curated System Design Documents and Release notes to the requirements of external clients.

Used: SQL, Python, Pyspark, AWS EMR, Tableau

Projects, Volunteering

Creator CUYACOURTS Jan 2023 - Dec 2023

- A download of criminal court docket data in analyzable format made publicly available to support democracy, data literacy, and technical upskilling - inspired by Harvard Law School's Caselaw Access Project and others.
- Open source packages: Selenium, SQLAlchemy Object Relational Mapper, Boto3
- Architecture: Github Actions, AWS Lambda, Elastic Container Registry, RDS, IAM Roles
- Scraper: https://github.com/nmolivo/case_scrape, Website: <https://nmolivo.github.io/cuyacourts>

Network Director WOMEN WHO CODE

Sept 2022 - Feb 2024

Serving as Director and Technical Speaker, I grew the Cleveland presence of the largest organization in the world dedicated to the success of women in technology careers.

- Speaker on topics related to Python, Web scraping, SQL, Prompt Engineering, and creating.
- Evangelist and recruiter of a growing community and executive leadership board

Education & Certifications

AMAZON WEB SERVICES

- Certified Cloud Practitioner

Feb 2023

GENERAL ASSEMBLY

Dec 2017

Immersive Data Science Bootcamp

SOCIETY OF ACTUARIES

- Foundations of Actuarial Practices Modules 1-7
- Exam P, Probability
- Exam FM, Financial Mathematics

Jan 2016

May 2012

Aug 2011

BALL STATE UNIVERSITY

May 2013

Bachelors of Science, Actuarial Science • GPA 3.6/4.0

Minor: Foundations in Business for Risk Management

Other Experience (before career change)

Senior Vendor Analyst PANTHEON INTEGRATED SOLUTIONS

Apr 2018 - Oct 2019

Procurement analyst to the Department of Navy's VIRGINIA Class Program Office (TS Clearance)

- Leader and stakeholder management in migration of existing databases to a Data Warehouse.
- Create data pipelines for ever-growing data sets, including (1) labor hour and material cost data from prime shipbuilders and sub-tier vendors, (2) capacity constraints, (3) supplier-customer relationships, and (4) other public source information.

Actuarial Contractor LYNCHVAL SYSTEMS

Mar 2017 - Apr 2018

Worked at the Pension Benefits Guarantee Corporation with a team to deliver an annual data reasonability checking process to update a database used to forecast future Pension Insurance performance.

- Over a span of 15 weeks, utilized the Department of Labor Form 5500 website, MS Excel, and proprietary software to create a database to analyze long term and catastrophic risk.
- Consistently reached personal deadlines early to assist with managerial tasks and conduct bigger-picture reasonability checking.

Actuarial Analyst WILLIS TOWERS WATSON

Jul 2013 - Jun 2016

Performed analysis and engineered plan-specific spreadsheets to provide clients with bulk benefit calculations, pension evaluations, and assistance in filing IRS Form 5500s.

- Assist in bulk lump sum offerings and accrued benefit computation projects by engineering plan specific spreadsheets and macros to produce bulk benefit calculations.
- Complete pension valuation work per PPA, PBGC and ASC guidelines using client data and proprietary Towers Watson valuation systems.
